

Mohamed Hameesh C

Flutter Developer & Product Engineer

Kerala, India • +91 87141 01148 • hameeshkinki@gmail.com

PROFESSIONAL SUMMARY

Flutter Developer and Product Engineer with 2+ years of experience building and shipping cross-platform mobile applications using Flutter and Dart. Experienced in multi-tenant and white-label applications, Clean Architecture, BLoC/Provider/Riverpod, REST APIs, WebSockets, Firebase, and third-party integrations. Proven experience taking products from requirements and architecture through development, security implementation, testing, and Google Play/App Store release. Currently contributing to Edmento's school-management ecosystem, with 7+ white-label applications supporting 10+ role-based user types.

TECHNICAL SKILLS

Languages: Dart, JavaScript, PHP, HTML5, CSS3

Mobile: Flutter, Android, Firebase

Architecture: Clean Architecture, MVVM, BLoC/Cubit, Provider, Riverpod, GetX, Dependency Injection (GetIt)

Backend & APIs: REST APIs, Dio, Retrofit, WebSockets, Firebase Cloud Messaging

Databases: Firebase, SQLite/Sqflite, Hive, Shared Preferences

Security: Multi-tenant access isolation, Runtime Application Self-Protection (RASP), secure local token storage

Maps & Native: Google Maps SDK, live location tracking, native Android integrations, home-screen widgets

Tools & Deployment: Git, Shell scripting, Figma, Google Play Console, App Store Connect

PROFESSIONAL EXPERIENCE

Edmento Technologies — Flutter Developer & Product Engineer

June 2025 – Present

Edmento Resolve — AI-Integrated School Management Platform

Live: [Google Play](#) • [App Store](#)

- Architected and shipped an AI-integrated school management platform with 10+ role-based dashboards, deployed as 7+ white-label applications on Google Play and the App Store.
- Identified and remediated a cross-tenant authentication vulnerability that could allow credentials from one school to authenticate against another; implemented school_id header injection with server-side validation to enforce tenant isolation.
- Re-architected the authentication response model from a flat role structure to a school-to-roles hierarchy, supporting users with different roles across multiple schools.
- Delivered core modules including real-time timetables, attendance, assessments, substitution management, online fee payments, Google Meet integration, offline meeting scheduling, and WebSocket-based chat.

Edmento-School Bus Management

Live: [Google Play](#) • [App Store](#)

- Developed a school transportation management module with live GPS bus tracking for parents, connecting parents, drivers, and school administrators in real time.
- Implemented automated fee reminders and driver/student leave tracking, along with transport attendance and route-management workflows.
- Designed a fraud-resistant and cost-efficient mileage verification workflow for outsourced transport vehicles, replacing continuous GPS streaming and AI-OCR processing with driver-submitted odometer photos and manual verification.

Additional Edmento Contributions

- Built Edmento Mini Apps and contributed to Edmento AI, an in-development SaaS platform delivering AI-powered learning tools for students and educators.

TL Technologies — Flutter Developer

October 2024 – June 2025

- Developed Frosty Business, a delivery-partner application supporting order acceptance, dispatch management, live location updates, and payout tracking; released on Google Play.
- Contributed to Frosty Foods, a consumer-facing food and grocery ordering application.
- Developed core modules for Every Home, a US-market home-services and hardware marketplace supporting service booking and multi-role account switching.

Cyra Learnings — Flutter Developer Intern

March 2024 – September 2024 | Tirur, Malappuram

- Developed and maintained cross-platform Flutter applications using Firebase for real-time data, authentication, and push notifications.
- Implemented MVVM-based application architecture with GetX, Riverpod, and Provider.
- Contributed to UI/UX implementation in Figma and backend functionality using PHP.

SELECTED PROJECTS

Sales Lead & Call Recording Tracker

Flutter, Native Android Integration | Jul 2026

- Developed a lead-tracking application for sales teams with lead/contact management and call-recording workflows.

- Integrated native Android functionality to capture and store call recordings while minimizing dependency on paid third-party call-recording APIs.

Posterify — Poster Design & Customization App

Flutter, PHP, Provider | Aug 2024 – Sep 2024

- Developed a poster customization application using Flutter and PHP.
- Implemented MVVM architecture and Provider-based state management.
- Integrated Razorpay for in-app purchases and premium subscription tiers.

DilsTrading — E-Commerce Admin Dashboard

PHP, JavaScript, CSS | Jul 2024 – Aug 2024

- Built an admin dashboard for product, category, and order management with dynamic JavaScript-driven interactions.

EDUCATION

Bachelor of Computer Applications (BCA)

Manipal University Jaipur — Online | Jan 2026 – Expected 2029 | In Progress
